CLASS B AIRSPACE COMMUNICATIONS

Socal App
124.3 124.5 124.9
125.2 127.4

SPECIAL FLIGHT RULES AREA
Air-to-Air 128.55

FOR OPERATING RULES AND PILOT AND EQUIPMENT REQUIREMENTS
SEE FAR 91.131, 91.117 AND 91.215

FLIGHT PROCEDURES

IFR FLIGHTS - Aircraft operating within the Los Angeles Class B Airspace must be operated in accordance with ATC clearances and instructions.

VFR FLIGHTS-

- Arriving aircraft should contact Socal Approach Control on specified frequencies. Although arriving aircraft may be operating beneath the floor of the Class B Airspace on initial contact, communications should be established with approach control for sequencing and spacing purposes.
- Aircraft departing the primary airports are requested to advise clearance delivery prior to taxiing of their intended altitude and direction of flight to depart the Class B Airspace. Aircraft departing from other than the primary airports whose route of flight would penetrate the Class B Airspace should give this information to ATC on appropriate frequencies.
- Aircraft desiring to transit the Class B Airspace must obtain an ATC clearance to enter the Class B Airspace and will be handled on an ATC workload permitting basis.

SPECIAL FLIGHT RULES AREA-Within this area, VFR aircraft are allowed to transition over the Los Angeles Intl airport under specific conditions without obtaining an ATC clearance. Altitudes above 3000' and below 5000' MSL are reserved to accommodate SFRA operations.

Runway Incursion Risk

OPERATIONAL NOTES

Turbulence may be deflected upward from the blast fence 180' (55m) east of Rwy 25R.

For aircraft with wingspan greater than 214' (65m) contact LAX airside operations for airport restrictions.

Major construction on airport, daily.

Aircraft use minimal power when taxiing in vicinity of terminals due to blast hazard.

Any aircraft that comes to a stop or has its momentum interrupted while turning and taxiing into its parking position, must stop and be towed.

Twys V, W, Y use caution on forward exit speed.

Rwy incursion risk. Limited distance between twys.

1 Contact Ground Control prior to pushback to Taxiway A-2.

2 Aircraft with wingspan greater than 198' outbound from Taxiway D8 may not turn westbound onto Taxiway D.

3 Simultaneous aircraft operations prohibited on Twys L and H-9 between Rwy 7L/25R and 7R/25L.

4 Aircraft with length greater than 240' (73m) are prohibited on Taxiways C-7, C-8 and C-9 between Taxiway C and Twy B.

5 Simultaneous aircraft operations prohibited on Twys H-2 and G between Rwy 7L/25R and 7R/25L.

6 Aircraft with wingspan greater than 155' (47m) westbound on Taxiway C are not authorized to make left turn onto taxiway C-10 under power.

7 Twy D between Twy D7 and D8 closed to aircraft with wingspan greater than 157' (48m).

8 The Box terminal southbound taxiing aircraft use minimum power due to blast hazard.

9 West/Remote Gates: Aircraft use of open gates as taxi path is prohibited (Gates 406, 407, 408, 409).

RUNWAY INCURSION HOT SPOTS

HS1

For information only, not to be construed as ATC instructions.

Runway incursion risk. Rwy 24L at Twys V, W and Y. Short distance between parallel runways. After landing Rwy 24R, manage taxi speed and expect to hold short of Rwy 24L at the appropriate runway holding position markings.

Runway incursion risk. Rwy 25L at Twy F. Aircraft cross Rwy 25L holding position markings without authorization. Aircraft on Twy A instructed by ATC to turn onto Twy F, expect to hold short of Rwy 23L.

Surface Incident Risk. Twy F from Twy A. Aircraft are frequently instructed by ATC to hold short of Twy F at the intermediate holding position markings. Do not proceed onto Twy F without ATC clearance.

CHANGES: Midfield Satellite Concourse ramp added.

© JEPPESEN, 1999, 2026. ALL RIGHTS RESERVED.

GENERAL

ASDE-X in use. Operate transponders with altitude reporting mode and ADS-B (if equipped) enabled on all airport surfaces.
Taxiway closures throughout the airport. Consult current NOTAMs.
Rwy 7R/25L preferred emergency runway.
Birds in vicinity of airport.
Runway Status Lights are in operation.
Low-level wind shear alert system.
Pilots should use caution for possible laser activity in the LAX area.

NOTES:

- 1 Aircraft with length greater than 240' (73m) are prohibited on Taxiways C7, C8 and C9 between Taxiway C and Twy B.
- 2 B777-200 aircraft and greater outbound from Taxiway D8 may not turn westbound onto Taxiway D under power.
- 3 Twy D between D7 and D8 (north of Terminal 1) closed to aircraft with wingspan greater than 157' (48m).
- 4 Aircraft with wingspan greater than 155' (47m) westbound on taxiway C are not authorized to make left turn onto taxiway C-10 under power.

For individual gate restrictions, please check LAX Rules and Regulations.

Gate 406 and 407 - All aircraft must push back. Southbound turn not available from west remote Gate 408 and west remote Gate 409.

APU use at West Imperial Terminal (WIT) gates only authorized as required for tow-in and departures operations due to noise sensitivity.

LEGEND
① Ramp Control Spot

① Ramp Control Spot

For individual gate restrictions, please check LAX Rules and Regulations.

The diagram shows a top-down view of a section of LAX, including taxiway A-2 and various parking bays. Taxiway A-2 runs diagonally from the top left to the bottom right. Along its left side are taxiway lights labeled A, 5A, 6, 7, 8, 9, 10, and 11. Along its right side are taxiway lights labeled A, 5A, 6, 7, 8, 9, 10, and 11. Various aircraft are parked in bays: FBO, SIA1, KAL1, KAL2, JAL, KAL, SIA, and FedEx. A note indicates 'Contact Ground Control prior to pushback to Taxi lane A-2.' with an arrow pointing to the taxiway. A scale bar at the bottom shows distances of 33-55.9 and 118-23.2. A legend at the bottom right shows 'HS2' and 'HS3' with corresponding symbols.
