

CLASS B AIRSPACE COMMUNICATIONS

FLIGHT PROCEDURES

- a. Arriving aircraft should contact Phoenix Approach Control on specified frequencies. Although arriving aircraft may be operating beneath the floor of the Class B Airspace on initial contact, communications should be established with approach control for sequencing and spacing purposes.
- b. Aircraft departing the primary airports are requested to advise clearance delivery prior to taxiing of their intended altitude and direction of flight to depart the Class B Airspace. Aircraft departing from other than THE PRIMARY airports whose route of flight would penetrate the Class B Airspace should give this information to ATC on appropriate frequencies.
- c. Aircraft desiring to transit the Class B Airspace must obtain an ATC clearance to enter the Class B Airspace and will be handled on an ATC workload permitting basis.
