

CLASS B AIRSPACE COMMUNICATIONS

FLIGHT PROCEDURES

VFR Flights-

- a. Arriving aircraft, or aircraft desiring to transit the Class B airspace should contact Honolulu Approach control on the frequency depicted for the sector of flight with reference to the geographic center of the airport. Pilots should state, on initial contact, their position, direction of flight and destination. If holding of VFR aircraft is required, the holding point will be specified by ATC and will be a prominent geographical fix, landmark or VOR radials.
- b. Aircraft departing the primary airport are requested to advise the Honolulu clearance delivery of their position prior to taxiing of the intended route of flight and altitude. Aircraft departing from other than the primary airport should give this information on appropriate ATC frequencies or as directed by ATIS information if route penetrates the Class B airspace.
- c. Aircraft desiring to transit the Class B airspace will obtain clearance on an equitable "first-come, first-served" basis, providing the requirements of FAR 91 are met.

VOT 111.0	PDC			West	118.3

OPERATIONAL NOTES

CAUTION: Hickam Ramp taxi instructions not valid within PHNL Airport operating area (AOA) which includes Twys A, B, portions of Twys V (south of Twy A) and T, and all runways. Aircrews must contact Honolulu Tower or Honolulu Ground as directed prior to entering or while within the PHNL AOA. Hickam Ramp will instruct all aircraft at the hazard cargo pad adjacent to Twy B. Twys A1-A4, V2-V5 and PHIK ramp side portions of Twy T and V (north of Twy A).

CAUTION - Use caution for obstacle 76' (23m) from Twy M centerline on oceanside, approximately 200' (61m) from parking apron.

- Due to non-visibility, tower unable to determine if the following areas are clear of obstructions and/or traffic: Portions of Twy J between Twy B and Rwy 8R; Portions of inter-island aircraft parking ramp.

- All jet aircraft contact ramp control prior to engine start at gate or hard stand.

- Threshold of Rwy 8L difficult to determine due to Twy T.

- Pearl Harbor-Hickam parking locations provide minimal wing-tip clearance for wide body aircraft.

- Military Operators: Refer to DoD/ANGA supplementary publications for additional information.

ⓘ Wide body and four engine turbojets landing rwy 4R roll to end of rwy, no left turn at twy K without tower approval.

RUNWAY INCURSION HOT SPOTS

HS1

For information only, not to be construed as ATC instructions.

HS1

Aircraft landing Rwy 4R and exiting left onto Twy K sometimes fail to hold short of Rwys 4L-22R and 8L-26R. When holding short, ATC is aware the aircraft tail is encroaching the landing runway.

HS2

Aircraft proceeding north or south on Twy E and instructed to turn onto Twy B sometimes miss the turn onto Twy B and enter Rwy 08L-26R or 4L-22R without clearance.

HS3

Twy V, Twy T, Twy A and Twy J in close proximity to Rwy 08L.

HS4

Minimal distance between Rwy hold short lines between Rwy 4L-22R/Rwy 4R-22L.

CHANGES: Intermediate hold marking added.

© JEPPESEN, 2025, 2026. ALL RIGHTS RESERVED.

GENERAL CAUTION: Birds in vicinity of airport. Bird strike hazard all runways. CAUTION: Recreational boating activities on and in vicinity of waterways. CAUTION: During periods of repeated precipitation anticipate wet runway conditions, if current conditions require confirmation contact Honolulu tower on initial contact. ASDE-X in use. Operate transponders with altitude reporting mode and ADS-B (if equipped) enabled on all airport surfaces. WSP (Weather System Processor). Due to tower location, controllers unable to determine whether acft are on correct final approach to Rwys 4L/R and 22L/R. HICKAM Ramp Facility-133.6, 234.8. Remarks: All aircraft in HIK flight line including hazardous cargo pad will contact HIK ramp prior to engine start/taxi.
