20 JUN 25 30-1P

MOSCOW, RUSSIA
AIRPORT BRIEFING

1. GENERAL

1.1. ATIS

ATIS 128.3
122.950 (Russian)

1.2. COMMUNICATION FAILURE PROCEDURES

In all cases it is possible to use mobile communication:

Flight Control Officer (Moscow TMA Control Center)

+7 (495) 956-87-33,

+7 (495) 436-25-36,

+7 (916) 043-35-90

Flight Control Officer (Moscow ACC):

+7 (495) 956-87-34,

+7 (495) 436-26-62,

+7 (916) 043-36-16

Flight Control Officer of the Moscow/Domodedovo aerodrome

+7 (495) 967-83-84

Monitor the aerodrome NDB for information and controller instructions.

1.3. LOW VISIBILITY PROCEDURES (LVP)

1.3.1. GENERAL

LVP Implementation

RVR value is below 550m at least at one of the three sites of visibility measurement and/or ceiling (vertical visibility) is below 60m.

ATS unit includes the following message in ATIS broadcast or advises the flight crew: "Low visibility procedures in progress, check your minimum."

ACFT shall taxi only along TWY with illuminated TWY centerline lights.

Flight crew is responsible for not following the assigned taxi routes on the maneuvering area and potential RWY incursion.

LVP Cancellation

RVR value is above 600m at all three sites of visibility measurement and ceiling (vertical visibility) is above 60m.

1.3.2. ARRIVAL

After landing, pilots shall choose the nearest suitable TWY for the RWY vacation.

Exits from the ILS critical area from RWY 13R towards TWY M (TWYs A7, A8, A9 and A11) are equipped with color-coded (alternating yellow/green) TWY centerline lights.

The ACFT must vacate the ILS critical area as quick as possible.

The flight crew shall report the RWY vacation to TWR only after passing the last yellow light of TWY centerline that means the vacation of ILS critical area.

After landing on RWY 13R the flight crew must vacate the RWY via TWY A7, A8, A9 or A11:

- When vacating RWY via TWY A7:

After report to TWR about the vacation of ILS critical area, the flight crew shall, by his instruction, change over to communication with Apron controller and under his supervision continue to proceed to the last green light of taxi route H2 taxi guideline, where the flight crew must stop and wait unless otherwise instructed by Apron controller. Further taxiing shall be carried out only after the Follow-me car.

UDD/DME
DOMODEDOVO

JEPPESEN
 20 JUN 25 **30-1P1**

MOSCOW, RUSSIA
AIRPORT BRIEFING

1. GENERAL

- When vacating RWY 13R via TWY A8, A9 or A11:

After report to TWR about the vacation of ILS critical area, the flight crew shall continue to proceed under his supervision along TWY M to the last green light of the TWY centerline of taxi route H2 guideline, where the flight crew must stop and wait unless otherwise instructed by TWR. By the instruction of TWR the flight crew shall change over to communication with Apron controller and report the ACFT position (TWY or taxi route) and the presence of the Follow-me car in front of the ACFT using the following phraseology:

"DOMODEDOVO Apron + ACFT callsign + TWY or taxi route + Follow-me car is in front of us".

Further taxiing shall be carried out under the supervision of Apron controller. Flight crew shall report parking of ACFT onto the stand to Apron controller using the following phraseology: "ACFT callsign + on stand number".

1.3.3. DEPARTURE

The flight crew of departing ACFT shall taxi only via TWYs equipped with TWY centerline lights. In case of a failure of TWY centerline lights or the stop bars the flight crew must taxi only after the Follow-me car.

ACFT shall taxi on the apron only under assistance of the Follow-me vehicle and supervision of DOMODEDOVO Apron controller.

During taxiing on the apron and on the maneuvering area, the flight crew should constantly check the ACFT position, especially at TWY intersections. In case of difficulty or doubt in determining the ACFT position, it is necessary to stop taxiing and report this to Apron controller or to TWR.

The RWY holding positions at RWY 13L (TWY B2), RWY 13R (TWY A2), RWY 31L (TWY A11) and RWY 31R (TWY B11) are designated by stop bars. Each stop bar consists of eight lights located across the TWY spaced at uniform intervals between the lights of 10'/3m, using red color to show the direction to the RWY holding position.

The flight crew should read back all instructions of TWR when holding at the RWY holding position.

After receiving the line-up clearance, the flight crew must start taxiing only after stop bar lights switched off. ACFT are PROHIBITED to cross stop bar light, when they are illuminated.

When LVP are in force it is PROHIBITED:

- Take-off from TWY/RWY intersection;
- Take-off without stop at the line-up position.

1.4. RWY OPERATIONS

Only RWY 13R/31L available for take-off and landing of A380, AN-124 and B747-8/8F ACFT.

1.5. TAXI PROCEDURES

1.5.1. GENERAL

Taxi and Tow Operations

- For ACFT with MAX wingspan of 262'/80m:
 - via route H2 from route 36 to route D4;
 - via route H1 from route 35 to route 36;
 - via route H1 from route T1 to route D4;
 - via routes 25, 35 and 36;
 - via route A3;
 - via TWY P4.

UDD/DME
DOMODEDOVO

JEPPESEN
20 JUN 25 30-1P2

MOSCOW, RUSSIA
AIRPORT BRIEFING

1. GENERAL

- For ACFT with MAX wingspan of 224'/68.5m:
 - via TWYs P5 and P6.
- For ACFT with MAX wingspan of 213'/65m:
 - via route H1 from route 35 to route 27;
 - via route 3 from route 35 to temporary parking point G17;
 - via route T2;
 - via route T1;
 - via routes 27, 28, 29, 30, 31 and 32;
 - via TWY P9;
 - via route H.
- For ACFT with MAX wingspan of 137'/42m:
 - via route H3 from route T2 to temporary parking point 61B;
 - via route H4;
 - via route 24;
 - via routes D3 and D4.
- For ACFT with MAX wingspan of 124.83'/38.05m:
 - via route D2.
- For ACFT with MAX wingspan of 118'/36m:
 - via route A10 from TWY P9 to stand M22.
- For ACFT with MAX wingspan of 117.4'/35.8m:
 - via routes 33 and 34.
- **PROHIBITED is:**
 - Taxi operations under own engines power:
 - via route 29 for ACFT with a wingspan greater than 127.9'/39m;
 - via routes 32 and 30;
 - along the hangar apron;
 - along the Interim apron from temporary parking point G1 to stand G10.
 - Simultaneous taxi operations of ACFT with a wingspan greater than 213'/65m via TWY A7 and TWY M abeam route H1.
 - Stop of ACFT on route T2 between TWY B3 and TWY B4.

ACFT must taxi along the apron at power not exceeding idle power to ensure safety of operation. If unable to taxi at power not exceeding idle power, flight crew must request towing assistance via DOMODEDOVO Apron controller.

Wide-body ACFT shall taxi via TWY P5, P6 only under inboard engines power, power of outboard engines shall not exceed idle power.

ACFT taxiing via TWY M shall give way to ACFT vacating the RWY.

ACFT shall give way to ACFT taxiing via TWY M (with exception of the situation specified above).

1.5.2. TAXI ROUTINGS

When RWY 13R/31L is used in mixed mode (departures/approaches), to regulate ACFT movements, route H1 and route H2 are used as follows:

- During RWY 13R operations - Route H1 is used for departures, route H2 is used for arrivals;
- During RWY 31L operations - Route H2 is used for departures, route H1 is used for arrivals.

UDD/DME
DOMODEDOVO

JEPPESEN
20 JUN 25 **30-1P3**

MOSCOW, RUSSIA
AIRPORT BRIEFING

1. GENERAL

1.6. PARKING INFORMATION

Parking on stands located on TWY is prohibited, if vacant stands are available on the apron.

Stands 1 thru 5, 8 thru 22, 20 thru 29, 30A, 31, 31B and 32 equipped with visual docking guidance system SAFEDOCK. Enter with MAX 4m/sec.

Stands 1 thru 5, 8 thru 18A, 20 thru 29, 29A, 30A, 31, 31A, 31B, 32 and 33A are equipped with aerobridges.

Stands 1 thru 33A shall not be used, if an INOP aerobridge remains on the stand occupying a position outside the working position limits.

Stands M7 thru M15 available for run-up.

Stands 119, 120 and 120A are available for commercial servicing and maintenance of ACFT.

Commercial servicing of ACFT on closed stands is prohibited.

Stands M14 (main), C5 and 47 are available as isolated stands.

Stands 119, 120 and 120A are available for ACFT maintenance.

1.7. OTHER INFORMATION

Birds.

2. ARRIVAL

2.1. COMMUNICATION FAILURE PROCEDURES

2.1.1. RADIO COMMUNICATION FAILURE DURING ARRIVAL

Follow route and profile of cleared (shortest basic) RNAV STAR to the maximum extent.

Execute IAP according to established procedure.

If necessary to deviate from indicated procedure, set transponder to 7700.

2.1.2. RADIO COMMUNICATION FAILURE DURING AND AFTER MISSED APPROACH

Continue maintaining the route and profile of missed approach procedure to the nearest holding area to the maximum extent.

Enter holding area at the upper published altitude at IAF, burn out fuel, if necessary.

After taking the decision to land at Moscow/Domodedovo:

- Execute IAP according to established procedure.

After taking the decision to proceed to the alternate AD in Moscow TMA:

- Proceed to DMD climbing to transition altitude 10000'.
- Proceed to IAF of the alternate AD in Moscow TMA via the following waypoints:
 - Moscow/Sheremetyevo: GEKLA - RUGEL - BESTA - SORET - RIMDE - KN - EE043 - EE044 - AGMER - EE045 - TAFAZ - KEZVU (IAF)
 - Moscow/Vnukovo: KIBUR - LO - BEMAS - TEBDI - TEPTA - RONEZ - TOLKE - TADUT - FIDOT - RORUK (IAF)
 - Ostafyevo: KIBUR - LO - BEMAS - TEBDI - TEPTA - RONEZ - TOLKE - TADUT - FIDOT - RORUK (IAF)
 - Ramenskoye: GENKE - RT - BW316 - BW317 - BW318 - BW319 - ODLOR (IAF)
- At IAF enter the published, if available, or standard holding area.
- In the holding descend from transition altitude 10000' to the upper published approach procedure altitude at IAF.
- Execute IAP according to established procedure.

UDD/DME
DOMODEDOVO

JEPPESEN
20 JUN 25 **30-1P4**

MOSCOW, RUSSIA
AIRPORT BRIEFING

2. ARRIVAL

After taking the decision to proceed to the alternate AD outside Moscow TMA:

- Execute approach according to the established procedure to IF.
- Proceed to the initiation point of the basic RNAV SID of the same RWY.
- Maintain the route and flight profile of the basic RNAV SID till leaving Moscow TMA to the maximum extent.
- Continue climbing to the flight level specially established for flight without radio communication (FL 140, FL 150, FL 240, FL 250) after leaving Moscow TMA.

After taking the decision to proceed to destination:

- Execute approach to IF.
- Proceed to the initiation point of the basic RNAV SID of the same RWY.
- Maintain route and profile of RNAV SID to the full extent until leaving Moscow TMA.
- Climb to flight level indicated in the flight plan.

If deviation from procedure is necessary, set transponder to 7700.

2.2. NOISE ABATEMENT PROCEDURES

Maintain the prescribed STAR routes and in case of deviation from them join the assigned track immediately.

RWY 31L/R are noise preferential RWYs.

In case of dangerous weather conditions in arrival and approach sectors, the flight crew can deviate from STAR route with mandatory report about it to ATC. Excessive descent speeds should be avoided if possible immediately prior to final approach segment.

Noise level must not exceed 85 dB 0700-2300LT and 75 dB 2300-0700LT.

Limitations

Change of flight configuration and speed shall be carried out according to the requirements of the Airplane Flight Manual.

During instrument as well as visual approach it is not allowed to fly below ILS GS.

Noise abatement procedures shall not envisage exceeding of indicated rate of descent.

A displacement of THR shall not be used as a noise abatement measure.

'AIR GROUND' communication shall be reduced to absolute minimum.

2.3. CAT II/III OPERATIONS

RWY 13R approved for CAT II/III operations.

2.4. RWY OPERATIONS

2.4.1. MINIMUM RWY OCCUPATION TIME

To reduce the time of RWY occupation the flight crews of landing ACFT are required to determine the nearest rapid exit TWY for safe and quick RWY vacate. Flight crew must inform the controller, if, for any reason, unable to vacate the RWY via the nearest TWY.

In those cases when it is necessary to expedite traffic, the flight crew executing landing may be instructed by DOMODEDOVO Tower:

- To carry out landing beyond the RWY touchdown zone;
- To vacate the RWY along the specified exit TWY;
- To expedite the RWY vacation.

UDD/DME
DOMODEDOVO

JEPPESEN
20 JUN 25 **30-1P5**

MOSCOW, RUSSIA
AIRPORT BRIEFING

2. ARRIVAL

Depending on the weather and RWY condition, RWY vacation along TWY must be planned by the flight crew considering the available distances shown in the table below:

RWY	TWY	Angle of taxiing off	ACFT	Distance from RWY extremity to taxiing off TWY, ft/m
13L	B1	90°	all	12,467'/3800m
13C	B7	30°		7776'/2370m
13R	A11	90°		11,480'/3500m
	A9	30°		8708'/2655m
	A8			7216'/2200m
	A7		light/medium	5740'/1750m
31L	A2	90°	all	11,480'/3500m
	A4	30°		8708'/2655m
	A5			7216'/2200m
	A6		light/medium	5740'/1750m
31C	B2	90°	all	7776'/2370m
31R	B11			12,467'/3800m

After landing the flight crew is not required to report to Tower about executed landing and RWY vacation (except, when LVP are in place) if the flight crew has not received such instruction from the controller.

After landing the flight crew must vacate the RWY without delays at safe speed of taxiing off the RWY via the TWY assigned earlier. The speed of RWY vacation via rapid exit TWYs shall not exceed 50 KT at the point of turning (TWY centerline adjoins the RWY centerline).

2.5. TAXI PROCEDURES

2.5.1. TAXI ROUTINGS TO VACATE RWY

The flight crew shall use the following taxi routes unless otherwise instructed by DOMODEDOVO Tower:

After landing on RWY 13L:

- vacate the RWY to the Right via TWY B11, then turn Right onto TWY T2 towards apron.

After landing on RWY 13C:

- perform a 180-degree turn on the area beyond RWY 31C extremity, then vacate the RWY to the left via TWY B7 to TWY T2 proceeding towards the apron.

After landing on RWY 13R:

- vacate the RWY to the Left along rapid exit TWY A7;
- vacate the RWY to the Left along rapid exit TWY A8 or A9, then turn Left onto TWY M and proceed to taxi route H2;
- vacate the RWY to the Left along TWY A11, then turn Left onto TWY M and proceed to taxi route H2.

After landing on RWY 31L:

- vacate the RWY to the Right along rapid exit TWY A6, A5 or A4, then turn Right onto TWY M and proceed to taxi route H1;
- vacate the RWY to the Right along TWY A2, then turn Right onto TWY M and proceed to taxi route H1.

UDD/DME
DOMODEDOVO

JEPPESEN
20 JUN 25 **30-1P6**

MOSCOW, RUSSIA
AIRPORT BRIEFING

2. ARRIVAL

After landing on RWY 31C:

- vacate the RWY to the Left along TWY B2.

After landing on RWY 31R:

- vacate the RWY to the Left via TWY B1.

After the RWY vacation the ACFT shall not stop on TWY for the purpose of expecting for the instructions of DOMODEDOVO Tower, but shall continue taxiing along the established taxi routes unless otherwise instructed by DOMODEDOVO Tower.

2.5.2. FREQUENCY CHANGE

Change of frequency during taxiing shall be carried out by the flight crew only by request. Unless otherwise instructed by DOMODEDOVO Tower, the flight crew must stop and request for a change of frequency as follows:

- after landing on RWY 13C - on TWY T2 opposite TWY B5;
- after landing on RWY 13R - at the end of TWY A7 or on TWY M before route H2;
- after landing on RWY 31L - on TWY M before route H1;
- after landing on RWY 31C - at the end of TWY B2.

Frequency shall be changed, when ACFT reaches transfer of control limit between DOMODEDOVO Tower and DOMODEDOVO Apron.

Flight crew must change frequency immediately, if instructed, confirmation is required.

Further taxiing on the apron to the assigned stand shall be carried out strictly following the instruction of DOMODEDOVO Apron.

2.6. OTHER INFORMATION

2.6.1. GENERAL

On initial radio contact with DOMODEDOVO Tower the flight crew shall report only the ACFT callsign using the following phraseology: "Domodedovo Tower + ACFT callsign".

On initial radio contact with DOMODEDOVO Tower the flight crew of ACFT having the category of turbulence wake as heavy, shall pronounce the word "Heavy" after the callsign of the ACFT.

When approach to RWY 13R or RWY 13L is operated at NIGHT and in conditions, when visibility is 2000 m or below, highway lights should not be confused with the RWY lights.

UDD/DME
DOMODEDOVO

JEPPESEN
20 JUN 25 **30-1P7**

MOSCOW, RUSSIA
AIRPORT BRIEFING

3. DEPARTURE

3.1. DE-ICING

Flight crew must advise DOMODEDOVO Apron controller on initial radio contact, if ACFT de-icing/anti-icing treatment is required.

The order of submission of requests for de-icing treatment does not affect the order of priority of de-icing/anti-icing treatment.

During de-icing treatment of ACFT, the crew shall maintain listening watch of DOMODEDOVO Apron controller.

The procedure of de-icing treatment of ACFT shall be carried out:

- At engines start-up points;

Engines start-up point	MAX wingspan for de-icing treatment
3, 6 and 30A	262'/80m
24 and 25	225'/68.5m

- On stands 52, 53, 76, 76R, 77, 77R, 81 thru 85R, 89 thru 96R, C1 thru C18, M16, M16A, M17 and M18 thru M25R;
- On temporary parking points 38B, 38BR, S8 and S8R.

Engines start-up points 24 and 25 are available for de-icing treatment of class E and F ACFT only.

De-icing treatment of ACFT with running engines is permitted on stands 52, 53, C2, C5, C8, C13, C17, M16A, M18, M19A, M21A and temporary parking points 86A, 86B, 97 and 97R.

When stands M19A or M21A are occupied by A321 type ACFT, taxiing/towing via route A10 (TR A10) abeam these stands is prohibited.

When de-icing treatment is conducted at engines start-up positions, engines can be started after treatment of the ACFT tail part is completed and wing treatment is in process, provided DOMODEDOVO Apron controller's clearance and approval of the ground handling specialist were obtained.

De-icing/anti-icing treatment of ACFT with running engines shall be conducted on de-icing aprons DA 1 and DA 2.

De-icing/anti-icing treatment of propeller-driven ACFT with running engines on de-icing aprons DA 1 and DA 2 is PROHIBITED.

DOMODEDOVO Apron controller determines, whether de-icing/anti-icing treatment of ACFT shall be performed on stands located on de-icing aprons DA 1 and DA 2.

If safety of start-up or taxi operations of ACFT with running engines to de-icing aprons DA 1 and DA 2 is not provided, flight crew has the right to cancel de-icing/anti-icing treatment of ACFT with running engines.

After reaching transfer of control limit, flight crew shall change over to communication with DOMODEDOVO Tower controller.

Flight crew shall change over to communication with DOMODEDOVO Apron controller at junction of TWY M and de-icing aprons DA 1 and DA 2 by the instruction of DOMODEDOVO Tower controller.

ACFT shall taxi onto/from de-icing aprons DA 1 and DA 2 only under minimum engines power.

Flight crew must exercise extreme caution with regard to personnel and transport facilities involved in ACFT de-icing treatment procedure. ACFT shall taxi into stands located on de-icing aprons DA 1 and DA 2 under the supervision of the ground handling service specialist.

UDD/DME
DOMODEDOVO

JEPPESEN
20 JUN 25 **30-1P8**

MOSCOW, RUSSIA
AIRPORT BRIEFING

3. DEPARTURE

After ACFT is parked on the assigned stand on de-icing aprons DA 1 and DA 2 flight crew, by the instruction of DOMODEDOVO Apron controller, shall change over to communication with DOMODEDOVO De-icing controller on frequency 130.600 MHz.

Flight crew must report start of de-icing treatment to DOMODEDOVO Apron controller.

After obtaining the code flight crew shall change over to communication with DOMODEDOVO Apron controller and report ready to taxi.

ACFT are permitted to taxi out of the stands located on de-icing aprons DA 1 and DA 2 only after obtaining Domodedovo Tower controller's clearance.

3.2. START-UP, PUSH-BACK AND TAXI PROCEDURES

3.2.1. GENERAL

On first radio contact with DOMODEDOVO Delivery, DOMODEDOVO Apron and DOMODEDOVO Tower the flight crew of ACFT, having the category of turbulence wake as heavy, shall pronounce the word "Heavy" after the callsign of the ACFT. Flight crews of departing ACFT shall contact DOMODEDOVO Delivery 15 minutes before ETD specified in the flight plan, provided ACFT is fully ready for departure in order to:

- Report the flight number (ACFT callsign), the destination aerodrome, the ACFT type, stand number, RWY for take-off;
- Obtain ATC clearance, RWY for take-off, SSR squawk, departure instructions, SID designator.

In case ACFT departure is delayed for 30 minutes or more, DLA message must be submitted to MATMC and addresses specified in ENR 1.10 and 1.11 sections of AIP Russia.

When ACFT is fully ready for departure flight crew shall change over to communication with DOMODEDOVO Apron controller by the instruction of DOMODEDOVO Delivery controller to obtain start-up and taxi (tow) clearance, specified stand number and acknowledging receipt of the latest ATIS information.

After engines start-up flight crew informs DOMODEDOVO Apron controller that ACFT is ready for taxiing, specified ACFT position on apron.

ACFT fully ready for departure means that all passengers are on board, the entrance and cargo doors are closed, the stairs are removed (the aerobridge is disconnected and is in a retracted position), a tow bar is connected (when towing is required), ground personnel is ready for towing (taxiing) and has established communication with the flight crew.

The flight crew shall switch transponder to Mode S before requesting tow or start-up clearance and switch it off after ACFT is parked on the stand.

Engines start-up can be carried out by a flight crew under tow if this procedure is prescribed by the Aeroplane Flight Manual (AFM) and was approved by the technical personnel of the tow team.

After starting the engines, flight crew shall report ready to taxi to DOMODEDOVO Apron controller using the following phraseology: "ACFT call sign + Ready to taxi", and receive instructions regarding taxi operations on the apron.

ACFT starting engines on start-up positions 22, 24, 25 and 43 have the right to commence taxiing before other ACFT.

Taxiing via TWY M behind ACFT holding at RWY 13R/31L RWY holding positions on TWY A4 thru A9 is prohibited.

UDD/DME
DOMODEDOVO

JEPPESEN
20 JUN 25 **30-1P9**

MOSCOW, RUSSIA
AIRPORT BRIEFING

3. DEPARTURE

3.2.2. FREQUENCY CHANGE

When giving taxi instructions on the apron, DOMODEDOVO Apron can assign the transfer of control limit to change over to communication with DOMODEDOVO Tower, using the following phraseology: "ACFT callsign + RWY + taxi routing + Tower frequency".

The flight crew shall change over to communication with DOMODEDOVO Tower at own discretion at the specific limit.

If intended to take off from RWY 31R, after changing over from frequency of DOMODEDOVO Apron to the frequency of DOMODEDOVO Tower, the flight crew shall maintain a listening watch and taxi to the RWY holding position on TWY B8 without contacting DOMODEDOVO Tower (except for LVP). The flight crew must standby to receive further instructions and clearances from DOMODEDOVO Tower.

3.2.3. TAXI ROUTINGS

The standard taxi routes to the RWY holding position are as follows:

- For RWY 13L - along taxi route T1 to TWY B1;
- For RWY 13C - along taxi route T1 to TWY B2, along taxi route H1 to TWY B2;
- For RWY 13R - along TWY M to TWY A2;
- For RWY 31L - along TWY M to TWY A11;
- For RWY 31C - along TWY T2 to TWY B7, then perform 180-degree turn on the area beyond RWY 31C extremity;
- For RWY 31R - along TWY T2 to TWY B11.

Flight crew must request DOMODEDOVO Tower controller's clearance to taxi via TWY M from the apron to RWY 13R/31L RWY holding position at all times.

3.2.4. INTERSECTION DEPARTURES

Depending on air or ground situation, take-off from intersections of TWY and RWY is permitted upon request of the flight crew or following the instruction of DOMODEDOVO Tower controller using the following take-off run distances available:

RWY	Intersection of TWY and RWY	TORA	ACFT
13R	A2	11,480'/3500m	all
	A4	8708'/2655m	
	A5	7216'/2200m	
	A6	5740'/1750m	light/medium
31L	A11	11,480'/3500m	all
	A9	8708'/2655m	
	A8	7216'/2200m	
	A7	5740'/1750m	light/medium

On initial radio contact with DOMODEDOVO Tower controller, flight crew may report ready to taxi to the RWY via a suitable TWY and execute non-stop take-off, after that controller shall provide instructions regarding further taxi operations. Absence of such report will be considered by the controller as an intention of the flight crew of the given ACFT to take off from the RWY beginning.

If ACFT requires backtracking the flight crew must report it to DOMODEDOVO Tower controller on reaching the RWY holding position.

Flight crew of the ACFT holding at the RWY holding position must be ready to line up and start take-off run immediately after obtaining clearance.

UDD/DME
DOMODEDOVO

JEPPESEN
20 JUN 25 **(30-1P10)**

MOSCOW, RUSSIA
AIRPORT BRIEFING

3. DEPARTURE

3.3. RWY OPERATIONS

3.3.1. MINIMUM RWY OCCUPATION TIME

If unable to comply with instructions to reduce RWY occupancy time flight crew shall inform DOMODEDOVO Tower controller before ACFT reaches the line-up position and advise time required to prepare for take-off.

Pre-flight cockpit checks should be completed prior to line up. Any checks requiring completion whilst on the RWY should be kept to the minimum required.

If take-off is executed from the RWY beginning, ACFT shall line up either immediately after the ACFT, which has commenced take-off run, or after the landing ACFT, which has crossed RWY THR.

In the event of take-off from TWY/RWY intersection, flight crew must line up immediately after the departing (arriving) ACFT passes abeam the RWY holding position where the ACFT is preparing to take off from the intersection.

The flight crew shall execute take-off immediately after receiving take-off clearance.

Conditional clearances are issued, when DOMODEDOVO Tower controller and flight crew have the appropriate ACFT in sight.

The ACFT causing the conditional clearance shall be the first ACFT to pass in front of the other relevant ACFT. In all cases conditional clearance is issued in the following order and consists of ACFT identification, instructions, clearance and a short repetition of the instruction.

This means that the flight crew obtaining a conditional clearance is required to identify the ACFT causing the conditional clearance.

3.4. NOISE ABATEMENT PROCEDURES

Noise abatement procedures during take-off and climb shall be executed by all ACFT but not at the expense of flight safety.

Maintain the prescribed SID routes and in case of deviation from them join the assigned track immediately. Noise level must not exceed 85 dB 0700-2300LT and 75 dB 2300-0700LT.

Take-off and Climbing Procedure

RWY 13L/R are noise preferential RWYs.

Noise Abatement Procedures NADP1

NADP1 is applied for take-off and climb procedures.

Restrictions

Change of flight direction (course) after take-off is permitted only after reaching 400' AAL.

3.5. COMMUNICATION FAILURE PROCEDURES

Radio Communication Failure after Take-off

Continue route and profile of the cleared RNAV SID to the most extent.

When taking the decision to return to Moscow/Domodedovo:

- proceed to SID termination point;
- then to the initial point of the shortest RNAV STAR;
- follow route and profile of RNAV STAR to the most extent;
- execute IAP.

When taking the decision to proceed to destination AD:

- continue climbing to the FL indicated in the FPL after leaving Moscow TMA.

If necessary to deviate from indicated procedure, set transponder to 7700.
